KX-R540 Portable Electronic Typewriter

15-Character Plus 7 Guidance LCD Display

In order to see your work before it gets printed on the page, as well as to have a window through which to view your stored text, the KX-R540 has a 15-character plus 7 guidance LCD display. Adjustable contrast control provides optimum clarity.

Accu-Spell Plus™*

With the Accu-Spell Plus™ spelling correction feature, you can worry less about typographical errors and misspellings, and concentrate more on your work. The Accu-Spell Plus™ feature actually recognizes misspellings, and offers you a selection of alternative correctly spelled words. You choose the correct word, and it automatically replaces the wrong word. The feature works in the text memory mode or the typewriter mode. The built-in dictionary contains 63,000 words, and you can even add up to 120 words of your own to the user's dictionary.

*Spelling programs developed and copyrighted by Houghton Mifflin Company, publishers of The American Heritage Dictionary.

Auto Column

When you need to set up lists or rows of data, just leave it to the Auto Column function. By giving you prompts through the LCD display, this automated ability leads you through the steps of constructing a rules table of data. As you input the information for each column, the typewriter will automatically place data the center of each column, or align numbers on the decimal point.

Letter Quality Daisywheel Printing Elements

Letter quality prints is one of the most important features to consider when choosing a typewriter. It's the accepted form for business letters, term papers, etc. That's why the KX-R540 electronic typewriter uses daisywheel printing elements. The KX-R540 includes the COURIER 10 style printing element, but you can add variety and style to your work with other optional type styles. Choose from PRESTIGE PICA 10, PRESTIGE ELITE 12, SCRIPT 10/12, GOTHIC 15, ORATOR 10 and BERLIN ITALIC 10/12.

8,000 Character Text Memory

You can store approximately 4 pages of double-spaced text within the internal memory of the KX-R540 electronic typewriter. With text stored in memory, you can make changes without having to retype the entire document.

Lift-off Correction System with One-Line Memory and Quick Erase

When typing directly on the page, just because you've made an error does not mean the page is ruined. Corrections can be made anywhere on the current line of type. A special lift-off tape actually removes errors clean off the page. You can even remove a whole word at a time with just one touch of the QUICK ERASE key.

Computer Interface Capability

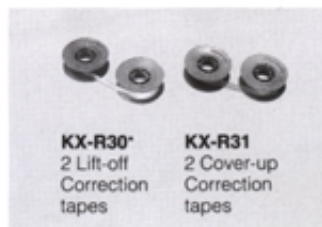

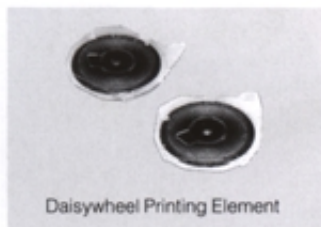

The KX-R540 can be connected to most personal computers via the optional KX-R60 parallel interface adaptor. In this way, you can use your typewriter as a computer printer.

优质菊花字轮打印零件

优质打印效果是选择打字机一个重要考虑条件。它是商业书信、论文等文件上可接受的表达形式。这是 KX-R540/R550 电子打字机使用菊花字轮打印零件的原因。它们包括小楷 10 号字式样打印零件，但您可以把其它可选择的式样品种使用到您的工作上。可选择大楷普通 10 号字、大楷小字 12 号字、草书 10/12 号字、粗体 15 号字、ORATOR 10 号字、斜体 10/12 号字。

8000/10000 个字符短文记忆

在 KX-R540/R550 电子打字机固有的内存记忆里您可以储存大约 4 或 5 页隔行打印的短文。短文内存记忆功能使您在修改文章时无需整篇重新打字。

一行记忆校正系统和快速删除(R540具备此功能)

当在纸上直接打印的时候，打字的错误并不意味着纸已成废，因您可于正在打字的一行之任何地方随意进行改正。实际上有一个专用的更正带可移动至错误的地方并予以清除，您甚至可以按下快速删除键一次性删除整个单词。

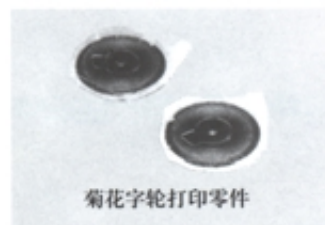

地址清单(R550具备此功能)

地址清单功能允许您储藏 50 个名字、地址和电话号码在可编辑记忆里。这就便于储藏主要的清单或者一个普通的报告。有了这个功能，您可以打印出顺序的清单或者单独的清单。

计算机接口性能

KX-R540/R550 可以通过选购件 KX-R60 接口适配器连接大多数计算机。这样，您的打字机亦同时可用作电脑打印机。
