Model

# KX-W1030 Personal Word Processor

## 80-Character by 14-Line Backlit LCD Display

In order to see your work before it gets printed on the page, as well as to have a window through which to view your stored text, the KX-W1030 has an 80-character by 14-line Backlit LCD display. Adjustable contrast control provides optimum clarity.

## Accu-Spell Plus™

With the Accu-Spell Plus™ spelling correction feature, you can worry less about typographical errors and misspellings, and concentrate more on your work. The Accu-Spell Plus™ feature actually recognises misspellings, and offers you a selection of alternative correctly spelled words. You choose the correct word, and it automatically replaces the wrong word. The feature works in the text memory mode or the typewriter mode. The built-in dictionary contains 63,000 words, and you can even add up to 120 words of your own to the user's dictionary.

\*Spelling programs developed and copyrighted by Houghton Mifflin Company, publishers of The American Heritage Dictionary.

## 3.5-Inch Floppy Disk Drive and MS-DOS™ File Converter

The KX-W1030 has a built-in 3.5-inch floppy disk drive (713 KB, double side, double density). This allows you to store text on as many standard 3.5-inch floppy disks as you need, providing almost limitless storage capability. And these floppy disks are the same as you would buy for many personal computers, so there's no need to specially order them. You can store multiple files per disk. There are built-in utilities to help you manage files, including Copy File, Delete File, Rename File and others. With the MS-DOS File Convert feature, the KX-W1030 can read and edit word processor text which is made by a computer (ASCII file), and allow a computer to read and edit text which is made by our word processor.

™MS-DOS is a trademark of the Microsoft Corporation.

## KX-W1030 Specifications

Printing Element	Drop in Daisywheel
Print Pitch	10, 12, 15
Line Spacing	1, 1½, 2

## Thesaurus

The KX-W1030 features a built-in Thesaurus. This handy thesaurus consists of 45,000 reference words and approximately 500,000 synonyms. To use, simply move the cursor to the word in question and identify the part of speech (noun, verb, etc.). The screen will indicate alternative words, or synonyms.

•Electronic Thesaurus developed by Houghton Mifflin Company, publishers of Roget's II. The New Thesaurus.

## 48,000 Character Text Memory

You can store approximately 25 pages of single spaced text within the internal memory of the KX-W1030 word processor. With text stored in memory, you can make changes without having to retype the entire document.

## Address List

The KX-W1030 word processor features an Address List function which allows you to store names, addresses and telephone numbers (max. 48 KB or 999 records) as one file onto a floppy disk.

This allows you to conveniently edit, store and print addresses as necessary. It's a handy way to store mailing lists, or just for general record keeping.

## Auto Column Plus

Auto Column Plus takes the bother out of typing columns and computing certain numerical data. When you need to set up lists or rows of data, just leave it to Auto Column Plus. You simply input the proper instructions, and the word processor will automatically arrange data as desired, aligning numbers on the decimal point and centring other information by column or line. Auto Column Plus can also perform basic calculations in addition, subtraction, multiplication and division.
